**Bayonne Bridge “Raise the Roadway” Project  
Periodic Weekday Traffic Holds  
to Begin Mid-November**

Beginning mid-November 2014, periodic 20-minute Bayonne Bridge traffic holds are required for motorist safety during installation of pier segments above the roadway.

This critical work is being performed during daytime hours to minimize nighttime construction noise impacts to communities in Staten Island and Bayonne, and allow the work to proceed more efficiently.

**Work Hours**

20-minute traffic holds, beginning at the top of the hour, may occur weekdays between 9 a.m. and 3 p.m. Traffic holds will vary in quantity and frequency as construction proceeds.

Please use the Goethals Bridge as an alternate route during these hours.

**Stay Informed**

To receive real-time info regarding the 20-minute holds, register for e-alerts at [www.paalerts.com](http://www.paalerts.com)

Customers can find the most current closure schedule on our website at [www.panynj.gov/alerts-advisories/advisories.html](http://www.panynj.gov/alerts-advisories/advisories.html)
